

Mask Guidance

Removing a mask:

Remove your mask using the loops, ties or band behind your ears or head. Be careful to avoid touching the front of the mask, and do not touch your eyes, nose or mouth. Wash your hands immediately.

Storing a mask:

If you need to use your mask for an extended period, carefully remove it from your face and fold it so the inside surfaces are touching each other. Place the folded mask into a clean, sealable paper bag or another breathable container. Do not store your mask in a plastic bag as this could encourage bacterial growth.

Washing a mask:

Cloth masks can be cleaned in a washing machine with your regular laundry. Use your normal laundry detergent and the warmest appropriate water setting for the mask's fabric. Then, place the mask in your dryer on the highest heat setting until it is completely dry.
